A variety of vases, pedestals, tables, &c. are admitted by all parties to be superior to any article previously exhibited, and to that material. Aberdeen, June, 1851.

RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others to their PATENT STONE, which in its composition, differs from all other artificial preparations for a similar purpose, forming the basis. In character, texture, and appearance it is made to resemble every kind of natural stone, so as to exclude from the finest marble to the coarsest sandstone, and to produce all their reliable and enduring properties without being liable to many of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, cornices, balustrades, terrace walks, vases and pedestals, &c. &c. also, for all varieties of plain and ornamental flooring. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as ordinary cement. Copies of Rasle, Maltasty, or other Works of Art, can be produced in the finest Patent Stone as faithfully as in Plaster of Paris.

IMPORTANT to WATER COMPANIES, MANUFACTURERS, and the PUBLIC.—RANSOME and PARSONS beg to call the attention of Water Companies, Manufacturers, and others to their PATENT STONE FILTERING SLABS, which are capable of filtering from 100 to 300 gallons of water per superficial foot per day, with a head of water varying from 3 to 6 feet. These slabs can be produced to any required dimensions, and consequently, can be adapted to any cistern, tank, or reservoir. Price per superficial foot.—Full descriptions and prices of their other manufactures will be supplied on application.
